Word Export Behavior

LibreOffice headless mode runs without its user interface. [C03]

Conversion options

LibreOffice accepts PDF as an output format and lets the operator choose the output folder. [C04]

Option	Meaning
--headless	Starts without the application interface. [C03]
--convert-to pdf	Selects PDF output. [C04]
--outdir	Selects the output directory. [C04]

Documented command shape

The official guide shows PDF conversion with an output folder. [C04]

```
soffice --headless --convert-to pdf --outdir reviewed report.doc
# Command options reference [C04]
```
